SONI DIEDHIOU

Cybersecurity Engineering Student – ENSIIE & M2 SECRETS (Paris-Saclay)

sondiedh@gmail.com | +33 6 88 87 66 21 | Île-de-France, France

LinkedIn: soni-diedhiou | GitHub: sondiedh-sys | Portfolio: soni-diedhiou-portfolio.vercel.app

*Engineering student on a dual degree (ENSIIE + M2 SECRETS), focused on security auditing, AI security and security architecture. I built and published a team of AI agents for security audits, and set up an Active Directory homelab, because I learn best by building. Looking for a **final-year cybersecurity internship (2027)**.*

EDUCATION

M2 SECRETS – Content, Network, Telecom & Systems Security **2026 – 2027**
Université Paris-Saclay / UVSQ, dual degree with ENSIIE. *Versailles / Évry*
Cryptography, systems & network security, web and application security, Windows/Linux security, intrusion detection & incident response, legal aspects. Final-year internship in semester 2.

ENSIIE – National Graduate School of Computer Science for Industry and Business **2024 – 2027**
Engineering Degree (Master's level), Software Engineering & Security track. *Évry-Courcouronnes*

Asia Pacific University (APU) – Exchange semester, MSc Cybersecurity **Jan – May 2026**
SOC, security architecture, threats. *Kuala Lumpur*

CPGE MPSI/PSI (preparatory classes, Lycée Michelet) **2022 – 2024** | **Baccalauréat, highest honours 2022**

CYBERSECURITY PROJECTS (PERSONAL)

Team of AI agents for security auditing *Claude Code, multi-agent, semgrep, nuclei, CVSS 3.1*

- Multi-agent team (static analysis, dynamic testing, orchestrator) that runs a white-box audit of an application with real tools (semgrep, gitleaks, nuclei, sqlmap) and produces a PDF report with CVSS 3.1 scores.
- Compared with a single-prompt audit: both found a high-severity flaw (CVSS 8.3) in an AI-generated app; the team found more on complex code (19 findings versus 10).
- Published: github.com/sondiedh-sys/ai-security-team.

Active Directory Homelab – Red Team / Blue Team *Samba AD DC, Wazuh, Kali, Kerberos*

- Deployed a domain controller (Samba AD DC: Kerberos/LDAP) and a Wazuh SIEM on virtual machines, attacked from Kali Linux.
- Documented attack scenarios (brute force, Kerberoasting) with a detection chain verified end to end in the SIEM (custom correlation rules).
- Goal: a secure architecture documented against the Well-Architected Framework (security pillar), delivered on GitHub.

Academic projects (APU): SIEM investigation of ~61k firewall events, DNS spoofing simulation (Ettercap/MITRE ATT&CK), Zero Trust architecture (Free/Iliad breach, NIS2/GDPR), secret exposure in public repositories, Windows kernel exploitation (DKOM).

WORK EXPERIENCE

CNAM – *Web Development & Statistics Intern* **Jun – Jul 2025**

- Designed and deployed data visualisation tools (Python/Flask, HTML/CSS): sondiedh.pythonanywhere.com.

Auchan – *Store Associate (part-time permanent contract)* **Apr 2025 – Jan 2026**

- Stock management and delivery intake; rigour and organisation. (Funded new work equipment.)

SKILLS & INTERESTS

- **Audit & pentest:** Kali Linux, Wazuh (SIEM), semgrep, gitleaks, nmap, Hydra/NetExec, Impacket, OSINT, MITRE ATT&CK, NIST CSF, Zero Trust.
- **AI tools:** proficient with Claude Code and building agents / sub-agents; integration through API and MCP; AI security (prompt injection, least privilege).
- **Application security:** OWASP API Top 10, OWASP LLM Top 10, MASVS, ASVS, CVSS 3.1, Supabase/Postgres RLS.
- **Networking:** Cisco Packet Tracer, NetSim, OSPF/RIP, Firewall (WatchGuard), Active Directory / Kerberos / LDAP.
- **Languages (programming):** Python, C, Java, C++, JavaScript, OCaml, SQL, PHP, Shell/Linux.
- **Ongoing practice:** TryHackMe, Root-Me, Cisco NetAcad. OSINT certification (Security Blue Team).
- **Languages:** French (native), English (B2, certified), basic German, Spanish, Arabic.
- **Interests:** Football (school team), weight training, video games.
